DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement filed June 18, 2001 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The disclosure is objected to because of the following informalities:

Page 3 line 11 the word "dMb" is suggested to be changed to "dBm"

Page 6 line 25 the word "the" is suggested to be changed to "a"

Page 8 line 6 the word "and the" is suggested to be changed to "and a"

Page 8 line 15 the word "the" is suggested to be changed to "a"

Page 10 line 1 the word "the" is suggested to be changed to "a"

Page 15 line 17 the word " C1 " is suggested to be changed to " C' "

Page 22 line 21 the word "30 dB" is suggested to be changed to "30 dB as shown in FIG. 4"

Page 31 line 11 the word "attenuator" is suggested to be changed to "amplifier"

Page 33 line 12 the word "40 dB" is suggested to be changed to "40 dB as shown in FIG. 10".

The European patent application EP1146707 should be mentioned in the application.

Appropriate correction is required.

Claim Objections

Claims 1-3, 5-8, 10, 12 and 13 objected to because of the following informalities:

As per claim 1-3, 5-7 and 14 recite the limitation "the carrier signal" in page 44 line 8 and "the judgment result" in page 45 line 14. There is insufficient antecedent basis for this limitation in the claim.

As per claim 8, 10, 12 and 13 recite the limitation "the carrier signal" in page 49 line 1 and "the judgment result" in page 50 line 12. There is insufficient antecedent basis for this limitation in the claim.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

In claim 4, line 4, the recitation "said level varying means" is vague and indefinite because it is unclear whether the said level varying means refers to the first varying means or second varying means.

In claim 10, line 4, the recitation "said level varying means" is vague and indefinite because it is unclear whether the said level varying means refers to the first varying means, second varying means or third varying means.

In claim 11, line 4, the recitation "said level varying means" is vague and indefinite because it is unclear whether the said level varying means refers to the first varying means, second varying means or third varying means.

In claim 14, line 7, the recitation "and third level varying means" is indefinite because of insufficient antecedent basis for this limitation in the claim. Claim 1 only discloses a first level varying means and a second level varying means.
